Kirby Rib II

Aerzen USA is a world leader in the production of rotary positive displacement machines and is based in Coatesville, PA. As part of its ongoing national growth and expansion, Aerzen recently opened a regional sales office in the Atlanta area to provide better service to customers in the south-east region of the United States. The building supports both a regional sales office, rental equipment and service depot.

The 24,740 sq. ft. facility consists of a 21,000 sq. ft. production/warehouse area and 2,800 sq. ft. of office space. It features several areas including space allocated for rental machines and spare parts storage, work cells for machine setup, repair and overhaul, and state-of-the-art testing capabilities.
