

Atlanta Auto Sales Dealership

LOCATION

Marietta, GA

SIZE

30,000 sf

ROOF SYSTEM

KirbyLOK Mechanical Seamed Roof

PRO Building Systems partnered with Kirby Building Systems to deliver Atlanta Auto Sales to their client. The project included a showroom, service drive, service shop, compressor shed and second level mezzanine.

The most complex portion of the project included the curved parapet/façade, which is the main architectural feature and faces the main road. The main framing system in the showroom included an interior support column and straight sidewall columns for maximum clearance. A KLS roof was selected with a tall clip to allow for increased insulation to meet the energy code. The walls selected were KRP covered with EIFS and KW where exposed.
