

Beyond Self Storage

LOCATION

St. Louis, MO

SIZE

108,900 sf

ROOF SYSTEM

KirbyLOK Mechanical Seamed Roof

WALL SYSTEM

Insulated Metal Wall Panels

Bringing a modern and community-centric business model to the self storage industry, Beyond Self Storage recently opened a new 108,900 sf facility in the St. Louis metro area. With the goal of constructing a facility that is significantly more attractive than traditional self storage buildings, Beyond Self Storage utilized a custom Kirby pre-engineered building and components to help reduce construction costs. The exterior of the building uses a standing seam metal roof as value added and has since been adopted as the Owner's building standard.
