

English Mountain Spring Water

LOCATION

Dandridge, TN

SIZE

52,500 sf

ROOF SYSTEM

SS 360

WALL SYSTEM

Kirby Rib II

Nested deep in the hills of East Tennessee stands a proud and beautiful mountain: English Mountain. Within English Mountain, 2,500 feet below the Earth's surface, an estimated 2.5 million gallons of clean, clear water flows from the spring every day. This pristine area, known locally as the "Promise Land," is the source for all water bottled by English Mountain Spring Water Company. There they take the water that is engineered by nature, and bottled a mere 900 feet from the source. No traveling, carrying or shipping that could lead to contamination.

Their new facility is a 52,500 sf custom Kirby pre-engineered building. The facility features a Kirby SS 360 roof system and Kirby Rib II wall system. English Mountain's bottled water surpasses all government standards for bottled water and has the distinction of being the only water bottling facility in the state of Tennessee that is NSF Certified.
