Insulated Metal Panels

Gardner Cold Storage is a family owned and operated company that also owns Badger State Fruit Processing, handling everything related to cranberry products from growing, to processing, warehousing and transportation. As a result, it is one of the most vertically integrated and cost effective suppliers of cranberry products in the country.

The recent 182,254 sf expansion, required a cold storage facility that could withstand many years of operation while also maximizing efficiency to keep operating costs low while achieving demanding temperature control requirements. The building was designed using a custom Kirby pre-engineered building with both insulated metal roof and wall panels.
