

## Project Spotlight

JUNE 2019

### Atlantic Aviation PDK

Builder: PRO Building Systems, Inc.

With over 70 locations across the US, Atlantic Aviation is a ground service provider for General Aviation aircraft, ranging from the small, single engine, Cessna type aircraft to the largest private jets, such as Gulfstreams and Global Express aircraft. Known in the aviation industry as an FBO, or Fixed Based Operator, their services range from selling jet fuel and renting hangar space for tenant and transient aircraft, down to arranging aircraft catering and ground transportation for aircraft visiting the locations.

Designed by Dye Aviation Facility Architecture and built by PRO Building Systems, Inc., Hangar O and Hangar N are two 12,000 sf, G-650 capable, general aviation hangars. Both have 2,500 sf office, galley, and restroom lean-to structures, R-23 roof insulation, and low-energy LED lighting throughout. Hangar O, facing Clairmont Road, has Metl-Span Tuff Wall Insulated Panels, Quik Brick wainscot, and an Assa Abloy Mega Door hangar door. Hangar N is an addition to a recently constructed duplicate building also built by PRO Building Systems in 2011. It includes approximately 800 sf of ground service support. Hangar N is constructed with conventional Kirby wall panels, Kalwall Panels around the top of the building to let in extra light, and a Norco Industrial sliding hangar door.

PRO Building Systems, Inc. is celebrating its 50<sup>th</sup> year anniversary in the design-build construction industry. PRO was recently awarded the 21 Million Dollar Recognition Award and the High-Performance Award, in recognition of shipment volume in excess of \$1,000,000.00 in 2018, by Kirby Building Systems. PRO has been partnered with Kirby for 33 years, and we look forward to many more.
