

February 16, 2021

Kirby Building Systems is constantly seeking ways to improve our product offering and remain the low cost supplier for our Builders. We are pleased to announce an improvement currently available to our **Roof-Lok and Roof-Lok Plus Vertical Rib Standing Seam Roof System**.

To provide customers with a more clearly defined product; Kirby is offering the Roof-Lok under two distinctive names to correlate with the type of seaming option offered. We will be renaming these to the **Roof-Lok 90 and Roof-Lok 360 Roof System**.

In addition, Roof-Lok includes the following design enhancements as part of this change including:

- Enhanced panel clip design
- Slight profile change in regard to female seam
- Improved ratings, added certifications and testing approvals

For more information, please reference the [Panel Specification Sheet](#).

Critical Dates: The option to select Roof-Lok 90 or Roof-Lok 360 will be available in eQuote effective immediately. For more information, contact your local Sales Representative or Project Coordinator. For more information, contact your local Sales Representative or Project Coordinator.

Our Commitment

Kirby Building Systems is committed to ongoing improvements in all aspects of our business. This change is intended to enhance our product offerings and improve our costs and competitiveness in the marketplace. Your input and comments are always appreciated. If you have specific questions regarding this bulletin or any other area of our business, please contact your District Sales Manager or Project Coordinator.
