U of M Indoor Football Practice Facility Builder: E&T Contracting, LLC

Located in Memphis, TN at The University of Memphis this custom pre-engineered metal building was the ideal solution for the new indoor football practice facility.

The structure is an 80,000 square-foot, 200' x 400' clear span building that provides 43' eave height and 58' clear ridge height. Kirby's Roof-Lok Plus roof system and the KirbyRib II wall system were utilized.

Erector and Authorized Kirby Builder, E&T Contracting, provided the furnish and erect solution for this spectacular facility featuring NFL-quality practice turf, floating goal posts and mechanical nets in each end zone.
