

Project Spotlight

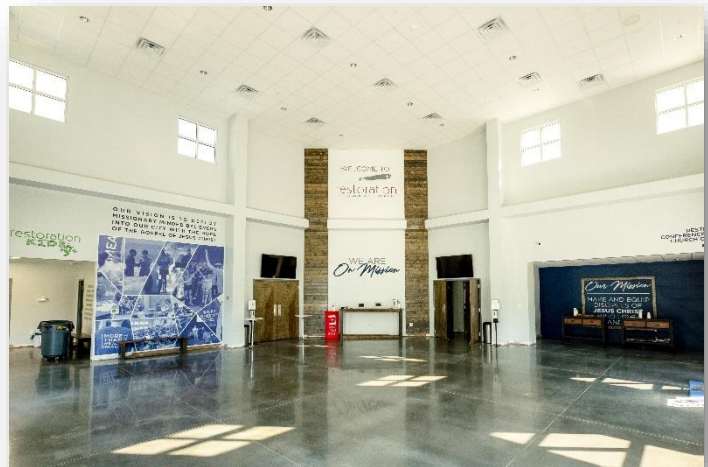

OCTOBER 2021

Restoration Community Church of Charleston

Builder: Tupco Inc.

Restoration Community Church is a growing group of people gathering in Hanahan, SC who love Jesus and are committed to reaching the un-churched of their community. Growing from 30 people meeting in the local elementary school in 2013, to over 500 people who now call Restoration home, the need for a new building was evident.

Kirby Authorized Builder, TUPCO Inc., was the general contractor for the project and completed the new facility in December 2020. TUPCO is a design-build general contractor located in Summerville, SC and specializes in pre-engineered buildings. This structure

features multiple single-slope pre-engineered metal buildings —two worship spaces, two multi-purposes areas, and a foyer —totaling 17,847 square-foot. The two worship center structures form a hip roof entry. The foyer structure has a four sided roof forming a hip to a single peak point. Kirby's Roof-Lok Plus roof system in Reflective White was utilized, as well as the KirbyWall wall panel in Royal Blue.
