

Canfield Junior Fair Coliseum

LOCATION

Canfield, Ohio

SIZE

35,000 sf

WALL SYSTEM

KirbyWall

ROOF SYSTEM

SS360 Standing Seam

Built with future expansion in mind, this 35,000 sf custom steel building is home to one of the largest fairs in the country - the Canfield Junior Fair. The 150' x 150' main building is clear span, with a 40' lean-to along both sides.

An 8' masonry wainscot surrounds this three-building structure, and thirty 3' square windows brighten its interior with natural lighting. The interior is lined with KirbyRib II liner panel.

It was erected using Kirby's ShakeoutPro staging app. ShakeoutPro makes constructing buildings more efficient by saving time in the receiving, unloading, and staging of steel on the jobsite.
