

Village Park Church

LOCATION

Fruitland Park, FL

SIZE

18,051 sf

WALL SYSTEM

Concrete Tilt-Up

ROOF SYSTEM

B-deck

BUILDING END-USE

Religious

Village Park Church was excited to move from their location in a local American Legion to this new attractive inverted gable facility with skewed corner walls. The congregation wanted minimal column intrusions for their sanctuary and large gathering areas, so large bays were designed using a bolted bar joist roof. The building is finished with a concrete tilt-up wall supported with wind beams provided by Kirby.
