AmeraTrail

Builder: Sherry Building Systems

AmeraTrail is a leading manufacturer of custom aluminum boat trailers with preferred fit builds and other custom utility trailers. They are also a dealer for several high-volume cargo, utility, and equipment manufacturers.

Kirby Authorized Builder, Sherry Building Systems, recently completed a new structure for AmeraTrail's facility in St. Cloud, Florida. The 80,000 square-foot structure features a 150' x 500' warehouse and storage building designed for a "mirror image" future expansion. In addition, a 95' x 50' office is included at the front side wall.

The boat trailer manufacturing facility is aesthetically pleasing with an exterior in the Kirby Standing Seam 360 roof system in Galvalume and the KirbyRib II wall panel in Fox Gray.

The plant features three 5-ton cranes by J. Herbert and two Schweiss bi-fold doors at the endwalls.
