

Project Spotlight

APRIL 2022

Cleary Construction Shop

Builder: J. Stephens Construction, Inc.

Cleary Construction, Inc. is an established, yet continually growing company that focuses mainly on municipal, industrial, and private underground utilities, treatment plant restoration, and design/build jobs.

Kirby Authorized Builder, J. Stephens Construction, Inc., recently completed a new structure for Cleary Construction's shop facility in Tompkinsville, KY.

The 16,500 square-foot structure utilizes Kirby's Standing Seam 360 Roof System in Galvalume, as well as the Kirby Rib II Wall System. An aesthetically pleasing parapet wall and canopy are incorporated in the design at the front entrance. For storage and a wash bay, two mezzanines are included. The shop also has a 10-ton crane, and five 18' x 18' garage doors are on each side wall.
