BUILDING END-USE

Liquor Store

This family owned and operated business gained a much larger showroom and ample space for inventory and customers to shop when they moved to their new facility in Jackson, Tennessee. The owners wanted a rustic storefront that was incorporated in the design using a standard single slope, clear span with girts on two-foot centers at the brick locations.

The building incorporates a 14' x 16' lean-to clear span canopy using Kirby Rib II complete ceiling liner panel. The front of the building is finished with brick including a parapet wall. A clean look is accomplished utilizing Kirby Rib II wall panel on the remaining walls.
