Office & Warehouse

Builder: 5 Bravo Construction

Kirby Authorized Builder, 5 Bravo Construction, is a full-service construction company in Lebanon, TN, specializing in design-build, construction, renovation, and repair.

For a private developer, this 11,100 square-foot office and warehouse space was created with two pre-engineered metal buildings — a 75' X 98'8" single slope and a 95' X 51' 4" single slope. The facility features Kirby's Standing Seam 360 Roof System in galvalume and the KirbyRib II Wall Panel in Fox Gray.

A loading dock extends into the rear end wall of the main building with Kirby supplying soffit under the recessed area. Kirby also supplied spandrels for the exterior concrete block, as well as the framing for the parapet walls.
