Ace Hardware – McDonough, GA **Builder: Stroud and Company**

Kirby Authorized Builder, Stroud and Company, is a full service commercial contractor, specializing in design-build construction. Located in Macon, GA, they specialize in commercial and industrial construction, such as general office buildings, churches, medical and dental offices, ambulatory surgery center, warehouses, distribution centers and everything in between.

Stroud and Company recently completed this 22,145 square-foot commercial retail space for Ace Hardware and additional tenant space in McDonough, GA. The structure was created using two single slope metal buildings— 79' X 196' and 59' X 103'.

The Kirby design provided structural support for the decorative tower to emphasize the retail entrance. Kirby also provided spandrel beams for the masonry exterior. In addition to the arched windows along the front of the building, parapet walls and a spandrel beam in a bypass position create a bump-out in the wall with the roof extending 12" — all adding to the aesthetics of this structure. Kirby's SS360 Roof System was utilized in Galvalume Plus, providing an extra protective layer. Kirby's R-Panel Wall System is utilized at the back of the parapet walls.
