

## Project Spotlight

OCTOBER 2023

### Summerwood Sports

**Builder: Davenport Contracting Incorporated**

Kirby Authorized Builder, Davenport Contracting Incorporated of North Little Rock, AR, has created two 101'4" x 120' side-by-side, single-slope structures for Summerwood Sports, located in Bryant, AR. Totalling 24,300 square feet of space, the mirror-image multi-use buildings house indoor basketball/volleyball courts.

The two gyms utilize Kirby's Standing Seam 360 roof system in galvalume. Rows of windows along the front of the buildings provide natural light to the gyms. Kirby designed the spandrel beams to support the brick façade, as well as provided soldier columns to help with the boxed-out/wrapped brick condition and the aluminum glass storefront. Kirby also designed for the scoreboards on the right and left end walls, centered, with high and low beams flush to the inside flange of the columns that the scoreboards attached to.
