

# FTY General Aviation Hangar

## LOCATION

Atlanta, GA

## SIZE

13,800 sf

## WALL SYSTEM

Insulated Metal Panels

## ROOF SYSTEM

Deck by Kirby

## BUILDING END-USE

Hangar

This aircraft hangar at the Fulton County Airport (FTY) includes a 12,000 sf hangar bay and 1,800 sf of high-end office space featuring a conference room, a lobby, a conference area, and more. A gable symmetrical framing system, two gable asymmetrical, and two lean-to structures complete the facility.

Kirby provided the spandrels for the 8" masonry around the exterior and parapet walls surround the hangar. The panels on the 110' x 28' clear Norco door match the same insulated wall panels utilized throughout. Big enough to house the largest-sized corporate jets, this hangar is also ventilated and has a 24' diameter ceiling fan for air distribution and high gloss epoxy floors.
