

# Eagle Carports

## LOCATION

Mount Airy, NC

## SIZE

60,000 sf

## WALL SYSTEM

A-Panel

## ROOF SYSTEM

Loc Seam

## BUILDING END-USE

Manufacturing/Warehousing

Eagle Carports manufactures a variety of steel structures, including metal carports, garages, barns, and utility buildings for residential and commercial use. This 60,000 sf manufacturing and warehouse facility allows plenty of space to produce and distribute steel tube framing components for carport and utility building products. A 3,500 sf conventionally framed office area attaches to the production building. Unique features include 100-foot clear span bays with a six-inch reinforced concrete slab, clerestory windows, and an EIFS color band on the front and rear elevations.
