## SIZE

9,800 sf

## WALL SYSTEM

R-Panel  
Regal White

## ROOF SYSTEM

Loc Seam 360  
Midnight Black

## BUILDING END-USE

Commercial Window Company

This 9,800 sf commercial office is home to Sanibel Glass in Fort Myers, FL. Needing a new facility due to hurricane destruction, impact glass specialists opted for a very modern and sleek structure.

The building utilizes a gable symmetrical, clear span frame with a rafter extension to create the clerestory. The front elevation features 140 linear feet of clerestory windows on the single-slope high side, casting natural light in the showroom below.

Three roll-up doors on the northeast side provide easy access. Kirby's Loc Seam 360 roof in midnight black and Kirby's R-Panel walls in regal white accomplish the modern and contrasting look. A masonry and glass storefront with a canopy completes the aesthetic.
