

## Project Spotlight

APRIL 2024

### Highlands Sports Complex

**Builder: Colaianni Construction, Inc.**

Located in Tridelpia, WV, the Highlands Sports Complex is an approximately 180,000 sf multi-use, state-of-the-art sports facility that includes six basketball/volleyball courts, a full-size indoor turf, full-size outdoor field, 4 battling cages/pitching tunnels, play climb area, arcade, second floor mezzanine, an on-site café and meeting and event spaces.

Kirby Authorized Builder, Colaianni Construction of Dillonvale, OH, completed approximately 140,000 sf of PEMB space, including the indoor football field building, the basketball/volleyball courts building, as well as a small canopy for this recreational complex. The structure utilizes Kirby's SS360 standing seam roof system. Additionally, Kirby provided two beams to support each of the 12 basketball goals. The walls were clad with insulated metal panels in a striped pattern.

Colaianni Construction began in the Ohio Valley in 1963 and is now a full-service general contractor and construction management team. In addition to construction management, they offer competitively bid/negotiated work, and design/build projects in the commercial construction sectors such as education, recreation, military, medical/hospital, religious, retail, and detention/correctional.
