Pearl Gray

ROOF SYSTEM

Standing Seam 360
Galvalume Plus

BUILDING END-USE

Office Headquarters/Warehouse

Hayden Power Group in Hazel Township, PA, embarked on a significant expansion that enlarges both office and warehouse operations. This three-building expansion utilizes a combination of single slope and lean-to framing systems that span 56,400 sf.

A highly functional 40,000 sf warehouse is equipped with two loading docks, multiple overhead doors, and a 10-ton crane system. The new warehouse and office buildings seamlessly connect to an existing front office. A-Panel walls in Pearl Gray paired with a Standing Seam 360 Galvalume Plus roof, deliver durability while also flawlessly complementing the existing office structure.

Additional features include bold Royal Blue bump-outs, a striking glass wall entrance, and an expandable mezzanine. Completing the project is a 6,400 sf lean-to canopy dedicated to housing the company's truck and equipment fleet.
